Local & General

Mr. and Mrs. Ed. Weiss were Lethbridge visitors Wednesday.

Mrs. G. Dupue was a Lethbridge visitor on Tuesday.

Found—A Stillson wrench. Owner call at Chronicle office.

J. Burnett of Calgary is a Champion visitor.

Mr. Bob Long of Calgary is a business visitor in Champion.

Mrs. Moffatt and Mavis are visitors at Carbon.

Mr. and Mrs. G. Harper returned to High River this week.

Mr. and Mrs. Ranch and daughter are business visitors in this community.

Mr. and Mrs. D. D. Farmer and guests were Clarendon visitors this week.

Miss J. Evans of Hannah was a guest at the home of Mrs. Mary Woodhull this week.

Mrs. Orr and Miss Edna Orr returned Monday from a holiday spent at Pine Lake.

Miss Hazel Fields is the house guest of her aunt, Mrs. Frank Clapp.

Miss Elsie McLean left Wednesday for Bawlf where she will take up Grade XII studies.

J. Lobban of Lethbridge has taken up employment in this district.

Mr. Dan Pierson of Idaho Falls is in the district for the harvest.

Miss Ethel McDougall expects to leave on Monday for Jarvis where she will resume teaching.

Mrs. Farmer and two daughters of Edmonton are spending a few days visiting at the home of Mr. and Mrs. D. Farmer.

Mrs. Guy Volney was a dinner hostess on Sunday, August 28, in honor of Mr. J. Volney's birthday.

Miss Rheta Campbell, who has been the guest of Mr. and Mrs. J. McLeod at Bawlf, was an Edmonton visitor this week.

Mrs. Bastin, Miss Molly and Miss Freda were Lethbridge visitors Monday, the latter taking an exam in arithmetic.

Mrs. J. S. Collins and Aileen were Lethbridge visitors Thursday, Aileen writing on an exam in geometry.

Miss Rheta Campbell who has spent the past month visiting at Bawlf returned to Champion Wednesday.

Miss Ruth Moyle has accepted a position teaching at Alton. Miss Moyle formerly taught in the Champion School staff.

Miss G. McNaughton left on Wednesday for Armada where she has accepted a position teaching in a rural school.

Mr. and Mrs. Bushfield of Calgary and Mrs. Dalziel of Portage La Prairie are guests at the home of Mr. and Mrs. John Cook.

Mrs. Katherine Bach left on Tuesday for Calgary where she will attend the Sacred Heart Convent. Miss Bach is taking grade XII.

The Ladies' Aid met on Thursday at the home of Mrs. Summers. Mrs. Boser and Mrs. Chamberlain served refreshments. The ladies decided to hold a tea and bake sale on Saturday in the old Economy store.

The tea and bake sale held in the old Economy store on Saturday was a decided success, \$24 being realized. The ladies wish to thank all those who rendered their assistance so willingly.

J. F. Cassidy is Taken by Death

Joseph Francis Cassidy, widely known druggist of southern Alberta, died Saturday, August 27th at Black Diamond, at the age of 53 years.

The late Mr. Cassidy was born at Buckingham, Quebec, and graduated from the Toronto School of Pharmacy. He had been in business in Calgary, Champion and Black Diamond.

He was a member of Calgary council of Knights of Columbus.

Mr. Cassidy is survived by his wife, Lily, four daughters, Rita, Loretta, Leone and Sheila, and three sons, Ivor, Kevin and Donald (at Black Diamond); four brothers, J. H. Cassidy, Ottawa; H. B. Cassidy, Quebec City; A. Cassidy, Portland, Oregon; and J. Cassidy, Mason, Quebec, and two sisters, Mrs. M. E. Prudhomme, Calgary, and Mrs. D. Worsley, Eckville.

Funeral mass was celebrated at St. Mary's Cathedral at 10 a.m. Tuesday, with Rev. A. McGillivray as the celebrant. Interment took place in St. Mary's cemetery with Jacques funeral home in charge.

Howerton—Lent

A quiet wedding was solemnized on Wednesday, August 31 at 5 o'clock when Miss Lent of Vulcan was united in marriage to Mr. A. Howerton of Champion. Rev. Dawson officiated.

Mr. G. Harper of Lethbridge Conservatory of Music will be at Mrs. Woodhull's residence on Saturday, September 30th. Miss Baulch, Walker of Vulcan, pianoforte teacher, will be at the residence of Mrs. D. D. Farmer.

Chas. Alexander, income tax inspector for the province of Alta, and Miss Alexander, his sister, and Robert Alexander, wife and daughter, brother of the above who is general salesman for Lake of the Woods Milling Co. visited at the home of M. G. Clever Sunday, incidentally playing 18 holes golf over the local course, returning home at 9.30.

NOTES AND COMMENT.

Higher Prices Help

Chief among the tangible signs which have led so many economic observers, such as Sir Walter Layton and Sir Arthur Salter, to decry the beginning of a business upturn is the growing stability of the level of commodity prices. According to the index of the United States Bureau of Labor Statistics, wholesale prices advanced nearly 1 per cent in July as compared with June, being 84.6, as compared with 83.9 in June, 1931 being regarded as the average of prices for 1931.

Business sentiment is powerfully influenced by the trend of commodity prices. Take first the manufacturer, the so-called "enterprise" of economic society. When prices are on the decline, he finds it difficult to sell his goods. He is forced to reduce his purchase of raw materials and his sale of the finished product, his profits have been eroded. He laments in a dear market and sold in a cheap market.

For this reason many manufacturers some time ago curtailed their operations to the point where the machinery was turned on solely to fulfill specific orders. But when prices are moving up, as they are today, the manufacturer begins to assume risks, channeling his goods to the open market, on the chance that prices for his goods will be higher than they were when the goods entered into the process of fabrication.

Behind the manufacturer there is the ultimate consumer. He is not called an "enterprise", but, as he sees a new strength in prices, he is likely to undo his purchases, on the theory that if he delays his buying, the time will come when he will have to pay a higher price for a wanted article. Action by the ultimate consumer has also been encouraged by the sight of buying outpacing selling on the security market. Through the advances in security prices not only do not enhance his buying power until they are accompanied by an expansion of bank credits, the sight of a better valuation for his savings, if he happens to be a security owner, will persuade him to spend more freely. Whatever was the original spur that put prices up (and the argument may be left safely with the economic historians), the main fact is that if they induce people to be confident, they are bound to be carried forward. This will make more "enterprises" out of the manufacturers. It will convince more people that the corner has been turned. For business is an endless chain of cause and effect, of action and reaction, with confidence as its nexus. It is what people think and feel that determines values.

(Experimental Farm Note)

The prevailing prices of farm products and the possibility of these low prices continuing for some time come before farmers to give the question of production their most serious consideration. Not only should the farmer's analysis be made of the various items of expense entering into the cost of production, but all the necessary steps should be taken immediately to reduce the controllable items to the lowest possible point consistent with efficiency. This will involve: The use of labor to the fullest extent in directly productive operations, the utilization of power both in house and tractor, to as nearly as possible its maximum capacity, the selection of the minimum amount of the necessary machinery of the proper size, the abandonment of superfluous land and better management of the land capable of producing, and every means to the cost of production per unit varies inversely with the yield.

Great economies can be effected by reorganizing the supply of labor and power and by more efficient management of these two controllable factors on many farms. This is brought out clearly on page 26 of bulletin No. 160, "Cost of Producing Farm Crops in the Prairie Provinces," by the Field Husbandry Division of the Experimental Farm System. The above publication is based on data collected at the Branch Farms over a period of years as well as data secured from a number of private farms.

Christian Science
Hymnal Contract
Keeps Plant Busy

The Kingsport Press, Incorporated, has received the largest known order of hymnals ever placed with a single concern. The order was placed by The Christian Science Publishing Society of Boston.

The order consists of 400,000 cloth-bound books and 100,000 de luxe full leather-bound books. The books will be distributed throughout the world. It is expected the distribution will begin about Sept. 1.

The music plates for the 610-page hymnal were prepared by the F. H. Gilson Company of Boston, nationally known music composers. All of the type for the plates was set by hand. E. W. Palmer, president of the local plant, said some idea of the magnitude of the order could be obtained by the quantity of material and time necessary for the completion of the book. Five of the largest perfecting presses of the Kingsport Press began work on putting the book June 15 and will run 20 hours each day until Aug. 25, at which time the printing is expected to be complete.

A total of 325 tons of paper will be used in the book, 40,240 yards of cloth, 30,000 yards of head bands, seven tons of end paper material, 50 tons of cover board, and more than 210,000 yards of muslin for reinforcement for the backs of the books.

Mr. Palmer said probably the most outstanding part of the manufacturing process will be the use of more than 210,000 yards of muslin going into the stamping on the cloth-bound edition and gluing the edges and stamping the de luxe edition. Mr. Palmer estimated the cost of the gold alone at \$18,500.

Ottawa appears almost deserted after the four busy weeks of the Imperial Economic Conference. The bilateral agreements signed by the heads of delegations at the closing plenary session make clear the policy that has been followed. This is free trade by means of reciprocal tariff preferences among nations of the British Commonwealth, rather than higher protection against the outside world. Trade within the Empire has unquestionably been promoted. Foreign nations, such as the United States, Argentina, and Russia, have suffered. A world economic conference is coming. The Ottawa meeting clarifies the British Empire's view of its own situation—and probably opens the door for world understanding to come in.

United Grain Growers Limited have announced the payment of a dividend at the rate of five per cent on the paid up capital stock of the company out of earnings for the fiscal year ending July 31st, 1932. In making the announcement during the course of a directors' meeting held at Calgary, K. S. Law, president of the company stated that the earnings of the company had been sufficient to pay bond interest, to provide full depreciation and after payment of the dividend to permit of a satisfactory addition to the surplus accounts of the company. Dividend cheques will be mailed from the office of the company on September 1st to shareholders of record at July 31st, 1932.

The Atlantic sky is full of men, women and wings. Solberg and Peterson take off from New York for Oslo, Lee and Bookham from Vermont for the same place, George Hutchinson and family light out for London. Ulrich, Liscall and Miss Newcomb make ready for Rome. Captain Mellican at New York delays his hop back home—a canny Scot, he dislikes a traffic jam.

The Alberta Wheat Pool is accepting wheat for pooling but an initial payment has not yet been fixed and will not be for several weeks according to officials of the pool Monday. An initial payment of 35 cents a bushel, basis Fort William, has been announced by the Saskatchewan Wheat Pool.

The Alberta pool, however, is making an advance on what delivered for pooling, but such can hardly be considered as an initial payment, it is pointed out. It is understood that an agreement has been reached with the Dominion government regarding the initial payment, but R. D. Purdy, manager, has not yet returned from Ottawa.—Calgary Herald.

Measures for the marketing of this year's wheat crop are under discussion between representatives of the three prairie governments, the wheat pools, the manager of the Central Selling Agency and Premier Bennett, along with Hon. E. N. Rhodes, and western cabinet ministers.

A satisfactory arrangement for the financing of the crop was made last year. It is desired that it be continued this year. While there may be some who would favor a sort of national organization to handle the crop the western spokesmen deny that any such scheme seriously enters into the calculation.

The Imperial Conference has been represented as having attained varying degrees of success. It is believed from the standpoint of the business and financial community that what was actually accomplished was more than had been anticipated. In a small way the changes are prevalent within our own little village. "Within the Empire" trade idea is stressed when one realizes the oranges and raisins now offered for sale by our local merchants are Australian grown.

The Dominion Government will take up with the banks the matter of guarantees.

The whole problem is to secure a maximum of efficiency in the marketing of the crop with a minimum of that paternalism which makes itself evident in tax bills.

Great Bear Lake Mineral Field Destined to Place Canada in Front As Largest Radium Producer

"Almost too good to be true," is the way J. C. McNabb, engineer of construction Canadian Pacific, describes prospects in the Great Bear Lake mineral field, following an inspection tour.

Mr. McNabb firmly believes in the enormous potential wealth of the district, he declared, and it will some day place Canada in the forefront of the world as a radium producer. Silver, copper, and other valuable minerals abound there, too.

The new radium plant, established by the Dominion Department of Mines in Ottawa, has completed several extractions of radium from the Great Bear pitchblende with "almost fantastic results," he continued. From 97 to 98 per cent. of the radium has been extracted from the ore in each test.

"The plant was placed in Ottawa rather than Great Bear Lake because three tons of acid to one ton of ore are used in the reduction process," he said. "Thus it is cheaper to ship out ore than to ship acid to Great Bear owing to prevailing transportation difficulties and high freight rates inevitable when supplies must be carried by airplane or portaged for many miles overland."

"I believe the Ottawa plant will become one of the leading units of its kind in the world. It is the only one of its kind in the British Empire at present and obviates the necessity of shipping the ore to Belgium or Czechoslovakia for reduction."

Mr. McNabb pointed out that the life of the radium salts secured from the Great Bear Lake pitchblende was estimated at 250 years while the Belgian product was effective for only 20 years. It was to be hoped, he concluded, that in the near future Canada would be able to break away from the Belgian combine with beneficial results for all mankind.

Problem Solved By Cook

High Electric Bill For Refrigerator Puzzled Service Man

Our record of the little battles between human and his machines has been lengthened by a little story about a refrigerator, sent us by a man who told us a story we had about an electric clock. The people who had sold the refrigerator received a call from its owner, asking them to hurry right around and make some sort of adjustment, any kind of adjustment. The thing was, the owner reported to a service man, eating his head off. It was using enough electric current to run a machine shop. The service man looked at the electric bills, before and after, and agreed that, indeed, something was radically wrong. He inspected the tebox carefully. Everything was fine. He went over the wiring. Nothing wrong. He went over a lot of things with no result. Then he sat down and looked at the machine reproachfully. While he was so engaged, the colored cook came in and he idly asked her how she liked her new refrigerator.

"I like it fine," she assured him, "see fine. I leave the door open and she cools the whole kitchen nobles." The New Yorker.

B.C. Gold

Gold production in British Columbia increased by 25 per cent. in the first half of this year. Placer mining is active with 5,000 men in search of gold. Production of all minerals in British Columbia in the first six months of 1932 was valued at \$14,356,000.

Blagay, a farm house 300 years old, in Glasgow, Scotland, is to be torn down to make room for modern buildings.

Indians often made pets of bears.

"Darling, do you think your mother will accept me as a son-in-law?"
"I am sure she will. We always agree about everything."—En Role 'Tall Tuna, Copenhagen.

W. N. U. 1937

New Buildings For University Of London

Over Forty Years Since First Ones Were Erected

London's famous "Bloomsbury" the Bloomsbury of lodging house and shabby streets—is doomed. Over a large part of it will rise a \$15,000,000 building project, destined when finished to house the University of London. Architects, under the leadership of Charles Holden, are engaged in designing the vast project, and the foundation stone is to be laid in the new year.

It will be many years before the whole of the new university buildings are ready, but it is hoped to have a portion of them finished for the celebrations in 1938. Yet for even this portion 10,000 expert drawings and blue prints are involved.

London university is the largest in Europe, but many Londoners are all but unaware of its existence. The present buildings of the university proper were erected some 40 years ago.

Pocket Radio Perfect

British Policemen Now Equipped With Instrument That Enables Him To Receive Spoken Messages

Exhaustive tests, which proved that pocket radios can be regarded as an accomplished fact, have been carried out at Brighton in the presence of British Home Office officials. The set, which weighs only 12 lb. 12 oz., is 6 in. long, 4 in. wide and 1 in. deep, and its easily into the breast pocket of a policeman's tunic.

A tiny bell fitted to the instrument rings when a message is about to come through and on applying an ear-phone the wearer can receive spoken messages as clearly as by telephone within a range of 50 miles. It is proposed to equip the Brighton police with the set, and it is likely that other forces will follow suit. The inventor is Mr. C. P. Dean, a young wireless engineer, of Slough, Buckinghamshire.

Fewer Giants and Dwarfs

Advance Of Medical Science Said To Be Reason

The death of Viado Velokovich, the world's smallest man, at Ljubljana, near Belgrade, brings to light the fact that both giants and dwarfs are becoming scarce. The advance of medical science is responsible for this change, and although the average general height has decreased slightly there are fewer extremes at either end of the scale. Viado earned his title with a mere 25 inches, but his widow is only four inches taller. While dwarfs are comparatively rare, there is much more competition for aspiring giants.

While doctors can offer no limits for dwarfs, giants do not often exceed seven feet. A surprising number have surpassed this imposing height, though, the most notable giant of recent years being Machnow, a Russian mammoth man. Machnow attained the enormous stature of nine feet eight inches, or over five times that of Viado. Machnow's appetite was in proportion to his bulk, for he required two quarts of milk, a dozen eggs and a couple of loaves of bread for breakfast. His dinner consisted of a mere three pounds of meat, five pounds of potatoes and half a gallon of beer, while at nine o'clock he fortified himself with a light supper of 12 eggs, three pounds of bread and butter and a quart of tea. For his evening smoke he could then stroll out and light his cigarette at a gasheer.

John Middleton, a Lancashire giant of the seventeenth century, is reputed to have attained nine feet eight inches also.—The World-View News Service.

Canadian Troops Made

Good Trade Emissaries

French People Acquired Taste For Their Cheese and Jam

Canadian soldiers who served in France acted as trade emissaries for Canadian products, according to Col. H. Barre, Dominion Trade Commissioner in France.

During the Great War, he said, in a recent interview, Canadian troops shared their cheese and jam ration with French people and the latter developed a liking for these foods. As a result there is a demand for Canadian cheese and jam in France, particularly in the northern part.

Airplane Delivers Paper

Losely Fire Lookout In California Receives Two Daily

Miles away from railroad or main highway the fire lookout at Frazier Peak, California, receives his daily paper by airplane.

A small group gathers twice a day to gaze at a speeding airplane as it drops a San Francisco newspaper on the way to Los Angeles and a Los Angeles newspaper on its way north again later in the day.

Jess Hart, the engineer on the flying craft, has received a letter from A. L. Ellis, lookout at the lonely station in the Tehachapi range, thanking him for the service.

SCOTLAND TO HONOR GREAT NOVELISTS MEMORY

Preparations are now well advanced for the celebration of the death of Sir Walter Scott (September 21, 1932). All during September two rooms in the National Gallery at Edinburgh will house a collection of Scott portraits and busts, and on September 21 a commemorative dinner will be held in St. Giles Cathedral (at right of picture). At the left is shown a view of Princess Street, Edinburgh, with the Scott Memorial in the foreground, and in the center is a portrait of the creator of Waverley Novels.

Interesting Research Work Planned For Investigations In Regard To Durum Wheat

Think These Over

Difficult Questions Given Freshmen

At End Of First Year Here are some of the questions University of Chicago freshmen had to answer at the close of their first year of study under the direction of Robert Macdonald Hutchins, the youngest university president in the country.

Do woodpeckers have sharp bills adjusted for pecking wood?

Do moths collect about a light at night only because of the presence of other moths?

Do potatoes stored in the dark lose weight faster after sprouts have grown out than before?

Does the spider weave its web to imitate its prey, or because of trial and error learning, instruction or instinct?

Is it true that polar bears are not found in the Antarctic because the environment is not suitable for their existence?

One of the most interesting questions asked the students to trace a "critical episode" in the life of a red blood cell that went adventuring with one of its fellows in a human body.

Brief Cognomens

World's Shortest Place Name Is In Sweden

The French claim the distinction of having the shortest surname in the world; writes a correspondent. That is "O" and it is fairly common in Paris. A good second is the Irish "Ek," which, curiously enough, is also found in Sweden.

Coming to the world's shortest place names, "A" in Sweden leads the way. Then "O" turns up once more as the name of a town in the Chinese province of Honan. But Holland has the last word (or letter) with "Y," which is the name of a bay in the Zuyder Zee.

It is not necessary to go abroad for examples of short names, writes another correspondent.

In iron-ore-shire there is the River E, rising in the Moonshill Mountains and forming a tributary of the River Gaurig. It is a tributary of the River Poyers which flows into Loch Ness.

Tell The Instructor

The sergeant-instructor was taking a class of backward recruits in musketry drill.

"Private Smithers," he said, with some wrath, "I just told you to take a fine sight and you at once did the opposite."

"Did I sergeant," murmured Smithers nervously.

"Yes, you did," snapped the sergeant. "You ought to know by now what a fine sight is. What is a fine sight, anyway?"

The recruit looked thoughtful.

"A very large ship full of sergeant-instructors sinking in the middle of the Atlantic," he returned.

Lodger: "Bring some soup, please." Landlady: "What kind, sir? Windmill soup?"

Lodger: "Windmill soup?" Landlady: "Yes. If it goes round, you get some."

The Associate Committee on Grain Research

Since its organization in 1927, has carried out an extensive programme of investigation of various factors affecting the quality of Western Canadian Hard Red Spring Wheat. Since quality is a purely relative term denoting the suitability of a given material for the particular purpose which it is intended to serve, such studies on the common or bread wheats involve a determination of their flour yielding capacity and their suitability for making yeast leavened bread possessing certain desired characteristics. For this reason the cereal research laboratories collaborating in the work of the Associate Committee on Grain Research are equipped with experimental flour mills and test baking equipment.

Durum wheat, however, is valued largely because of certain specific characteristics which make it particularly suitable for the manufacture of alimentary pastes such as macaroni, spaghetti and vermicelli. In the manufacture of these products, sensuous, refined granular product of the wheat is chiefly used, requiring special rolls which shear the wheat rather than crush it into flour. In order to remove bran and germ particles, a current of air is drawn through the material in a special apparatus known as a Bascor separator. The experimental flour mill and test baking testing is constructed along similar lines to the large scale commercial facilities. As an experimental mill and purifier, specially designed for durum wheat is now being purchased as part of the equipment comprising a complete durum testing laboratory being installed in the Department of Agricultural Chemistry, University of Manitoba. This phase of the Committee's activities will be under the direction of Dr. W. F. Geddes. To determine the quality of semolina an experimental macaroni unit comprising a mizer, kneader, macaroni press and dryer is an essential part of the equipment and is being built by a commercial manufacturer of large scale macaroni machinery to rigid specifications.

In contrast to the flour milled from bread wheats, an interesting pigmentation is desired in semolina. This coloration is due to the pigment carotin and for its accurate determination a spectrophotometer is essential. The addition of this apparatus to the laboratory equipment of the Committee will not only enable accurate quality studies on durum wheat to be carried out, but will be of inestimable value in determining the carotin content of flour milled from different varieties of bread wheats. It will also be useful in a study of the relative ease of removal of the yellow color from the different flours by means of bleaching agents.

The laboratory about to be installed will be the only one in Canada and will permit the Committee to carry out projects on durum wheat, such as have already been completed on the common wheats. The durum projects will include studies of varieties and the influence of environment on macaroni making quality.

Britain's Largest Station

In Great Britain the largest railway station is Waterloo, where, in twenty-four hours, 1,400 trains are dealt with at twenty-three platforms. The busiest junction is Clapham Junction, through which upwards of 2,000 trains pass every twenty-four hours.

A physicist finds that a room full of men can hear speech better than the same room full of women, because heavy clothing that men wear absorbs sound waves.

Pelicans have no song and the adults no call notes.

Among our special ambitions is to be the weak link in a chain letter.

THE HOUSE OF DREAMS-COME-TRUE

— BY —
MARGARET FROELER

"The Splendid Folly," "The Hermit"
Hodder & Stoughton, Ltd., London.

CHAPTER XXX.—Continued.

Facing her, as she reached the top-most step was a glass door, giving entrance to Claire's own particular sanctum, which usually, in summer, stood wide open to admit the soft, warm air and the fragrant scents breathed out from a border of old-fashioned flowers, sweet and prim and quaint, which encircled the base of the house.

But today the door was shut and forbidding-looking, and Jean experienced a sudden sense of misgiving. Supporting Claire's elbow, she had just when she had arrived brimming over with the hundred little feminine confidences that were to have formed part of the "heart-to-heart" talk. It would be too aggravating!

Her eager glance flew ahead, searching the room's interior, clearly visible through the wide glass panel of the door. Then, with a startled cry, she halted, her hand clapped against her lips in a gesture of silent exclamation of dismay and terror that had leapt to them.

The afternoon sunshine slanted in upon a picture of grotesque horror, a nightmare conception that could only have sprung from the macabre imagination of a madman.

In the middle of the room Claire sat bound to a high-backed chair, secured by cords which cut cruelly across her slender body. Her face had assumed a curious ashen shade, and her eyes were fixed in a numbed look of fascinated terror upon the tall, gaunt figure of her husband, who, seated in front of her jerkily, like a marionette, while he threatened her with a revolver, his thin lips, smiling cruelly, drawn back from his teeth like those of a snarling animal.

He was addressing her in queer, high-pitched tones that had some thing inhuman about them, the ending, empty sound of a voice no longer controlled by a reasoning brain.

"And you needn't worry that Mr. Brennan will be overheard with grief at your early demise. He won't—he-he—he," he gave a foolish, cackling laugh—"he won't have time to miss you much! I'll attend to that. I'll attend to that! There'll be a second bullet for your dear friend, Mr. Brennan."

"... Crack! The sharp report of a revolver shattered the summer stillness as Jean sprang forward and wrenched at the handle of the door. But it refused to yield. It had been locked upon the inside!

Then, as the clock cleared away, she saw that Claire was unhurt. Sir Adrian had deliberately fired above her head and was now rocking his long, lean body to and fro in a paroxysm of horrible, nervous mirth. Evidently he purposed to amuse himself by inflicting the torture of suspense upon his victim here he actually murdered her, for Latimer had been at one time an expert revolver shot, and, even drug-ridden as he had since become, he could not well have missed the helpless target by accident.

Claire's head had fallen back, but no marvellous oblivion had descended upon her. Her face looked like a mask, set in a blank stupor of horror.

The sound of the shot brought Blaise and Nick racing to Jean's side. One glance through the glass door sufficed them.

"God in heaven! He's gone mad!"

CARTER'S KIDNEY PILLS

W. N. U. 1907

Nick's voice was quick with fear for the woman he loved.

"Get Tucker here at once!"

Blaise's swift command, flung at her as he and Nick left forward, sent Jean flying along the terrace as fast as feet winged with unutterable terror could carry her. As she ran, she heard the crash of splintering glass as the two men she had left behind smashed in the panel of the locked door, and, almost simultaneously, Sir Adrian's pistol barked again—another shot, and then a third in quick succession.

The sound seemed to wring every nerve in her body. Blaise—

And that madman shot her?

With sobbing breath she rushed blindly on into the house, met the butler, running too, white faced and horror-stricken.

"My God, miss!—Sir Adrian's murdering her ladyship and the room door's locked."

The man almost babbled out the words in his extremity of fear.

"The terrace door," Quick Tucker!"

"I'm sure you can," she said gettily.

"As soon as we can bring her ladyship round, you shall help me undress her and put her to bed."

In a few minutes Claire recovered consciousness, but she was horribly shaken and disoriented, crying and clinging to Jean or to the housemaid—who was almost crying, too, out of sympathy—like a child frightened by the agonized thudding of her heart.

For the moment she was physically unable to run another yard.

But her mind was working with abnormal clarity and swiftness. This was her doing—hers. If she had not dissuaded Nick that day when he had

entreated her to leave Claire away with him, all this would never have happened.

... Claire would have been safe—safe! But she had interfered, she had insisted that no real good ever came by doing wrong, and now her creed had failed her utterly.

Nick's resistance of temptation was not a failure in a ghastly tragedy that might have been avoided. To Jean it seemed in that moment as if her world were falling in ruins about her.

Stuck with apprehension she almost reeled out again into the mocking summer sunlight, and, running as fast as the convulsive throbbing of her heart would let her, regained the far end of the terrace and peered through the door that led into Claire's room.

Its great panes were shattered, jagged teeth and spikes of glass stuck out from the wooden framework, while here and there, dependent from them, were bits of cloth torn from the men's coats as they had scrambled through.

Within the room Jean could discern a confused burly-figured of swaying, writhing figures—Blaise and Nick and the butler struggling to overpower Sir Adrian, who was fighting them with all the cunning and the strength of a madman.

Beyond came the clamour of people battering uselessly at the door, the shrill, excited voices of the frightened servants who had collected in the hall outside the room.

For a few breathless seconds Jean was in doubt—wondered wildly whether Sir Adrian would succeed in breaking away from his captors.

Then she saw Nick's foot shoot out suddenly like a pistol, and the engine, and Sir Adrian staggered and came crashing down on to his knees.

The other two closed in upon him swiftly, and a minute later he lay prone on his back with the three men holding him down by main force.

With difficulty avoiding the protruding pieces of glass, Jean stepped into the room. Her first thought was for Claire, who now hung helpless and unconscious against the bonds that held her.

But Blaise very speedily directed her attention to something of more urgent importance for the moment.

"Get some cord, one of you," commanded Jean authoritatively. "Anything will do if it's strong."

Two or three of the servants took from the main body and ran frantically in search of the required cord, glad to be of use, and very soon Sir Adrian, bound as humanely as his struggles rendered possible, was borne to the room and laid upon his bed.

"Get some cord, one of you," commanded Jean authoritatively. "Anything will do if it's strong."

Two or three of the servants took from the main body and ran frantically in search of the required cord, glad to be of use, and very soon Sir Adrian, bound as humanely as his struggles rendered possible, was borne to the room and laid upon his bed.

agitating and amazing news he had to impart, transmitted the message to the doctor's parlour and at the other end of the wire, adding a few picturesque and stimulating details concerning the struggle which had just taken place, and which, apparently, he had perceived with the eye of faith through the wooden panels of the locked door.

Meanwhile Nick and Jean had turned their attention towards releasing Claire, who, as the last of her bonds was cut, toppled forward in a dead faint into the former's arms.

A second procession wended its way upstairs, Nick bearing the slight, unconscious figure in his arms while Jean and a kindly-faced housemaid followed.

"Her ladyship's maid is out, miss," volunteered the girl. "But perhaps it can help!"

Jean smiled at her, the frank, friendly smile that always won for her the eager, willing service of man and maid alike.

"I'm sure you can," she said gettily. "As soon as we can bring her ladyship round, you shall help me undress her and put her to bed."

In a few minutes Claire recovered consciousness, but she was horribly shaken and disoriented, crying and clinging to Jean or to the housemaid—who was almost crying, too, out of sympathy—like a child frightened by the agonized thudding of her heart.

OGDEN'S CUT PLUG

If you "roll your own," use Ogden's fine cut cigarette tobacco.

Little Helps For This Week

"My peace I give unto you,"—John xxv. 27.

Then leave thy vain attempts To seek for peace; The world can never give One soul's release; But to thy Saviour's heart Securely dwell, No pain can harm thee hid In His sweet will.

—Adelaide Anne Procter.

He says Himself that His peace is not what the world giveth. It does not come from anything in this life; it cannot be taken away by anything in this life; it is wholly divine. As a white dove hovers brighter and fairer against a black thunder-cloud, so Christ's peace is brightest and sweetest in darkness and adversity.

—Harriet Beecher Stowe.

Benefit Canadian Ports

As a result of the six cents a bushel preference granted Canada by the United Kingdom in the agreement signed at the Imperial Economic Conference, millions of bushels of Canadian wheat that has formerly been shipped via the United States will now be exported from Canadian ports. J. H. Inailville, president of the Montreal harbor commission stated.

WHEAT CROP FINANCING PLAN IS ARRANGED

Ottawa, Ont.—Arrangements were completed here between the Federal Government, the banks and the western pools for the financing of the pool's share of the new crop. It was arranged also that the pools be supported by the government in operating a voluntary pool, such as was done last year when the government put up the money for an initial payment of 35 cents a bushel. Approximately the same initial payment will be guaranteed this year.

In effect the government renewed last year's policy. Whether the pools are completely satisfied with the government's treatment will not be clear for a few days. Last year was a small crop year, and the line of credit extended by the government was allocated accordingly. To give the same credit this year, when the crop is larger, might not suit the pools as well. The conference, however, said the pools as well as those got last year, and it is quite probable they got more. The precise terms of the credits to be given were not available.

With respect to the carryover of approximately 80,000,000 bushels of the 1930 wheat pool holdings, the government agrees to maintain its policy of not selling unless sales can be effected without tumbling world prices.

In view of these decisions by the government, the delegation which was headed by Premier J. E. Brownlee of Alberta, and included Premier John Bracken of Manitoba, returned to the proposal for a Canadian wheat board. In the judgment of the interests represented by the delegates a national wheat board would meet existing conditions. The Bennett government, however, is opposed to such a board, and in view of the government's attitude the case for a board was not presented.

Plight Of Farmer

Agnes MacPhail Refers To Low Returns From Farm Products

Ottawa, Ont.—"There is bitterness in the hearts of the farmers," declared Miss Agnes MacPhail, M.P., in addressing the Canadian Institute on Economic and International Affairs here. "The resentment of the farmer against those who are supposed to lead him is a very real thing."

The value of Canadian field crops in 1931 was \$700,000,000 less than in 1928, "yet the farmer's overhead remained the same," she continued. "If he could meet his debt with potatoes and hops and chickens and cream, his position would be as good as three years ago, but when he converts his commodities into dollars, he finds his overhead is two or three times what it was three years ago."

The "patriotic market-splitting" which was called the Imperial Conference would not remedy the situation," she maintained. There should be publicly-owned processing plants in various parts of Canada to handle the products of the new state. Canada's only woman member of parliament.

House Opens In October

Exact Date Has Not Yet Been Announced

Ottawa, Ont.—Canada's parliament will open in October about the same time as the British House and parliament of several other dominions. This was the intimation on high authority.

The question was under discussion at a meeting of cabinet ministers in the absence of definite information of convening dates from Great Britain and some other countries of the commonwealth, it was decided to leave the matter of fixing the day for the opening of the Ottawa parliament in abeyance.

As trade agreements entered into at the Imperial Conference cannot come into effect until parliamentary approval has been given, in government circles the hope had been expressed that parliament might be convened early in October.

Enter Military College

Ottawa, Ont.—Thirty-eight recruits, including 24 from the east and 12 from the west, have been selected to enter the Royal Military College of Canada, Kingston, Ont., for the term commencing August 29, the Department of National Defence announced.

W. N. U. 1507

C.N.R. Retrenchment

Economies Expected To Effect Saving Of \$700,000 Annually

Montreal, Que.—Economies of about \$700,000 annually are expected to result from further reductions in personnel and salary ratings announced by S. J. Hungerford, acting president of the Canadian National Railways. In August, 1931, salaries of officers and supervisory forces were cut 10 per cent. The continuing decline in revenues, Mr. Hungerford said in a statement, has necessitated further retrenchment.

The programme of curtailment of staffs is believed to abolish about 50 positions, while the cuts in salaries are, in connection with higher paymen at least, expected to run as high as 40 per cent.

Action was taken, the statement said, after a careful examination of the duties performed by the many officers. Wherever it appeared possible without lowering efficiency, such a course was adopted. The salary cuts affect all those receiving \$5,000 a year or more.

Besides the matter of economy alone, the statement indicates, certain special circumstances had to be taken into account. For several years executives had not been occupied with transportation and maintenance alone. Problems of reorganization and consolidation of lines, construction and institution of improved practices had required more men of executive type. These were not now necessary in so large numbers and many cases their positions might be abolished.

A Retaliatory Measure

Dean Corbett Refers To Effect Of Economic Conference On U.S. Trade

Williamstown, Mass.—The Imperial Economic Conference at Ottawa was described largely as a retaliatory measure initiated for the most part by Canada to express resentment against the Hays-Simons trade mission of the United States, by Dean P. E. Corbett of McGill University.

Acting as chairman of a special symposium on the conference in connection with the Institute of Politics here, Dean Corbett agreed however, with Prof. John Henry Williams, University of Toronto, that the Ottawa agreements would not seriously disturb United States trade.

Prof. T. E. Gregory, of London, England, distinguished British economist, asserted the Ottawa agreements represented the victory of "raw material countries over an old industrial country."

Cholera Raging In China

Deaths In Shenai Province Total 500 A Day

Hankow, China.—Reports from various districts of Shenai Province said cholera is raging throughout the province with increasing intensity, thousands of lives being lost. Scores of villages have been wiped out, it was said.

Cholera is more virulent throughout China than elsewhere, and may be in recent years, and even foreigners living where sanitary conditions are good, and clean food is obtainable, have been stricken.

The disease continues unabated throughout the Yangtze Valley provinces despite cooling weather, which usually puts an end to it. Hundreds are dying daily in Honan, Anhwei, Hupeh and Shenai, the provinces which are hardest hit. The disease is sweeping towns, villages, and the countryside alike.

Script For Tax Payment

Calgary, Alberta.—Issuance of script valued at \$1,150,000, which represents one-third of the annual tax revenue to be returnable to the city for payment of taxes only, has been recommended to the city by the Unemployment Married Men's Association, as a means of saving bank interest and exchange losses totalling about \$74,000.

Prince May Visit Sweden

London, England.—It was learned on high authority that the Prince of Wales intends to visit Sweden some time in October but that no definite date for the trip has been fixed. The information recalled frequent rumors in the past that Prince Ingeborg of Sweden might become the prince's bride.

Boycotting Japan

Shanghai, China.—The "Blood and Iron" society, an organization formed to promote an anti-Japanese boycott, is becoming increasingly active with threats against merchants handling Japanese goods.

Drowned In Arctic

H. G. Watkins Was One Of Britain's Distinguished Explorers

Angmagssalik, Greenland.—H. G. Watkins, one of the most distinguished of younger British explorers, was drowned when his kayak—a one-man Eskimo canoe—upset in the sea. He was only 25 years of age.

Watkins returned Augustine Courtland from the Greenland icecap last May after Courland, a member of Watkins' expedition, had been marooned for several weeks.

Details of the accident were not available. Watkins was leading an expedition investigating possible sites for air bases on an Arctic air route between Great Britain and Canada.

Despite his youth he had established himself as a distinguished explorer. He held the Royal Geographic Society's medal. Shortly before he set out on this expedition he became engaged to marry Miss Margaret Rose Graham.

The kayak is a difficult craft to operate. The Watkins' expedition had several experts on board, and the members went into training to learn how to use them.

S.S. Pennyworth Sails

Capt. Mount Expects To Make Second Round Trip This Season

Churchill, Man.—Following a race against time when extra shifts worked throughout the night the S.S. Pennyworth sailed away at 2:35 a.m. Wednesday, August 2, for London, England, carrying 255,700 bushels of No. 1 Northern wheat and 880 tons, or 31 cars of flour and feed. The last minute rush gave Capt. W. Mount a chance to clear out on the high tide with a ship low in the water, and filled to capacity. He will make fast time to England in the hope of making a second trip this season.

BACK TO THE LAND PLAN TO BE ENCOURAGED

Ottawa, Ont.—Although the time has been too short to discuss the general reaction, the opinion has been expressed in many official sources that the provisions in the agreements reached at the Imperial Economic Conference would result in a stimulation of the movement "back to the land."

"All that is wanted is a tangible hope that the farmers may get a return for the labor—even to an extent only approaching what they could expect from industry in the urban centres—to restore the equilibrium to a more healthy state," declared one official here.

Since 1901 there has been a steady decrease in the rural population and a corresponding increase in the growth urban population. In 1901, the percentage of heads of families earning their living direct from the land was 68. In 1931 this percentage had fallen to 40.

A constant stream of provincial and municipal officials has been passing through the colonization offices of the Minister of Immigration since the inauguration of the "back to the land" movement early this summer, and every province in the Dominion is now actively interested.

ROYAL SUSSEX REGIMENT TAKE OVER GUARD DUTIES

When the Brigade of Guards who normally furnish the guard for the Palace left London on Field Training the 1st Battalion Royal Sussex Regiment took over the guard duties. The Royal Sussex men are shown with their regimental march pasting Buckingham Palace. It is considered a great honor to be given the duties of guarding the British Royal Palace.

FORMS WHITE ARMY

Dr. O'Tiggins, of the Irish Free State, President of the volunteer division of the Saorast Army Comrades

Dr. O'Tiggins, of the Irish Free State, President of the volunteer division of the Saorast Army Comrades, who announces the formation of a new "white" army which will stand between the people and the menace of secret organizations, to protect lawfully constituted government and maintain law and order.

Dr. O'Tiggins, of the Irish Free State, President of the volunteer division of the Saorast Army Comrades, who announces the formation of a new "white" army which will stand between the people and the menace of secret organizations, to protect lawfully constituted government and maintain law and order.

Curfew Law Enforced

Nine O'clock Means Something To Children In Ayrmer, Quebec

Ayrmer, Que.—The long, mournful call of a siren sounded on a recent night—it was the 9 o'clock curfew—but it meant nothing to the children on the streets, who continued to play. Suddenly, Chief Delbert Dumoulin and his nine girls, ranging in age from nine to 16 years.

For the first time in eight years, since it was placed on the statute books, the curfew law had been enforced. "And from now on," Chief Dumoulin explained to the irate parents, "it will be enforced."

Anglo-Canadian Treaty

Premier Brownlee, Of Alberta, Sees Benefit To Western Canada

Ottawa, Ont.—Western Canada should benefit from the wheat and livestock provisions of the Anglo-Canadian trade treaty, this opinion expressed by Premier J. E. Brownlee, of Alberta, who is conferring with the Dominion Government on the financing of the 1932 wheat crisis.

The six-per cent preference in the British market, said Mr. Brownlee, should benefit the western farmer and the removal of the restrictions against Canadian cattle should prove an added boon.

An Unrealized Ambition

Montreal, Que.—General Sir Arthur W. Currie, commander-in-chief of the Canadian corps in France, and now principal of McGill University, confessed his unrealized ambition to have been a member of one of Canada's Blenheim teams. The admission came during a luncheon to a contingent of British cadets, who arrived here following their shoot at Caumont ranges, Ottawa, against the pick of Canada's young rifle shots.

Manitoba Reducing Civil Service Salaries

Government Maps Out Economy Programme To Balance Budget

Winnipeg, Man.—Determined to cut some \$750,000 from its expenditures for the present fiscal year, the Manitoba Government will reduce the salaries of all its employees by another seven per cent, beginning September 1.

The cut, together with one effected previously, brings the total reduction to 15 per cent on lower salaries and 25 per cent on higher. It affects everyone from cabinet ministers down.

Faced with declining revenues and increasing expenditures on relief, Premier John Bracken and his ministers recently mapped out the economy programme which is designed to keep the budget balanced.

Besides the salary reduction, amalgamation of various government services, elimination of a number of grants and reduction of the grant to the University of Manitoba are forecast. Mr. Bracken said there would be curtailment of grants to public schools.

Free Trade For Denmark

Canadian Business Men Bidding For Large Portion Of Market

Montreal, Que.—Adoption by Denmark on September 1, of a sweeping trade policy was announced by the Montreal Board of Trade on the basis of "authoritative" information. The council-general for Denmark in Montreal was unable to confirm the announcement although it had been unofficially reported to him officials of the foreign exchange department of the Danish National bank in Copenhagen had issued a statement to this effect.

The council-general for Denmark in Montreal was unable to confirm the announcement although it had been unofficially reported to him officials of the foreign exchange department of the Danish National bank in Copenhagen had issued a statement to this effect.

RAIL PROBLEM

REPORT TO BE SUBMITTED SOON

Ottawa, Ont.—The report of the royal commission on transportation will be ready well in advance of the opening of parliament. Whether or not it will be given out before the session is held until the members can have the first look at it, is for the government to decide. The commission prepares the report and presents it to the government. Then its duties are complete.

The actual writing of the report has not yet commenced, it is understood. The commissioners, under the chairmanship of Mr. Justice L. F. Duff, are gathering day after day, sifting the facts collected in all-tings throughout Canada and considering possible remedies for the situation as presented to them.

They have before them the balance sheets of both great Canadian railways, supplemented by the personal testimony of Sir Henry Thornton, former president of the Canadian National, and E. W. Beatty, president of the Canadian Pacific. High officials of both systems have furnished information.

Provincial governments and business organizations have been given a chance to present their views. It is for the commission to produce from the great mass of evidence before it, some suggestions or recommendations which will tend to the solution of Canada's greatest social problem.

The question of establishing a permanent commission to supervise the operations for both railways has not yet been decided. It is considered whether or not this will find a place in the commission report remains to be seen. Certainly it appears likely that the report will contain recommendations designed to cut out duplication of lines and services. It will also, in all probability, include a means for control of motor bus and truck competition.

If the report contains any drastic recommendations for cutting out branch line services, its reception in parliament is apt to be somewhat mixed. Members of parliament are inclined to be critical of any proposals which tend to deprive their constituents of railway services.

SEES TENDENCY TOWARDS LOWER TARIFF BARRIERS

Washington, D.C.—Stanley Bruce, former Canadian premier, told newspapermen here that the chief objective of the Imperial Conference was that it had given the world a lead toward tariff reduction.

Asserting that economic recovery could not come without lowering tariff barriers, Mr. Bruce said he looked to the approaching world economic conference to carry forward the work begun at Ottawa.

"The significant thing about the Ottawa results," he said, "is that the proposed tariff changes are all downward, we are removing obstacles to trade within the empire, not putting up new ones. That is a good start toward economic recovery."

Mr. Bruce paid a brief visit here on his way to London, England, to attend resident Australian minister there. He said his Washington visit had no official purpose. He paid courtesy calls at the White House, the State Department and the Dominion legations. Mr. Bruce said there was no intention to add an Australian legation to the list. Discussing Australian policy, Mr. Bruce admitted that the British Empire was artificial and artificial interference with trade, and not ordinary legislative protection for industry, was the cause of Australia's troubles, he explained.

Mr. Bruce said he was satisfied with the agreement on meat reached at the conference, and he believed it would increase Australian mutton exports. He would not comment on the probable gains in trade between Canada and Britain.

Mr. Bruce said he was satisfied with the agreement on meat reached at the conference, and he believed it would increase Australian mutton exports. He would not comment on the probable gains in trade between Canada and Britain.

B.C. Apple Growers

Profit By Preference

Britain Not Likely To Buy From United States

Victoria, B.C.—The preference of 38½ cents a box on Canadian apples granted by the United Kingdom, together with the 10 per cent premium on American maple, will drive United States apples out of the British market, said a spokesman of the British Columbia Department of Agriculture. The United Kingdom takes annually between 5,000 and 6,000 cars of boxed apples from the Northwest states and British Columbia. The most this province can ship at present is three thousand cars. Department officials say that with the price levels maintained, apple growers are in a fair way to dispose of their entire crop with a net profit of close to 80 cents a box.

Will Aid Canadian Ports

Grain Formerly Shipped Via U.S. Now To Go By Dominion Routes

Montreal, Que.—As a result of the six cents a bushel preference granted Canada by the United Kingdom in the agreement signed at the Imperial Economic Conference, millions of bushels of Canadian wheat that has formerly been shipped via the United States will now be exported from Canadian ports, J. H. Rainville, president of the Montreal harbor commission, here stated today.

He declared that the agreement would result in a great increase in the handling of grain in Montreal, Saint John, N.B., and Halifax.

Results Not Optimistic

Capitulation, South Africa.—"Concessions granted South Africa cannot be expected to bring about any material improvement in the country's economic position at the present time or for many years to come." This was the comment of Gen. Jan Christian Smuts on the work of the Imperial Conference.

Crop Predictions

Winnipeg, Man.—Western Canada will this year garner 180,000,000 bushels of wheat more than it did last year, according to estimates of the Seale Grain Company. They place this year's western crop at 450,000,000 bushels, the second largest in the history of the prairie provinces.

Champion Meat Market

Local and General

Del. Summers of Vancouver is a visitor in Champion.

Versluys is a patient in the Vulcan hospital, taking treatment for injuries received in his recent accident.

Mr. and Mrs. Ed Selland were visitors at the home of Mr. and Mrs. Denison of Winnifred recently.

F. R. McLean, R.O., of McLean & Anderson, Sight Specialist of 221 8th Ave West, Calgary, will make his monthly visit to Champion, Friday, Sept. 2nd at the Drug store.

Miss Mabel Racher received word recently from the General Hospital board, Calgary, that her application was accepted. Miss Racher expects to enter training in September.

B. M. Roberts of Calgary spent a few days visiting in Champion last week, leaving on Sunday for Warner where he will be the guest of W. S. Ryan for a few days.

Heavy showers on Monday and Tuesday evenings over the whole district delayed harvesting at least another week. The grain has been bleached considerably and whether this means a cut in the grade remains to be seen.

Lethbridge Conservatory Of Music

Successful Candidates

The following is a list of the successful students who passed the recent examinations held here by the Associated Board of the Royal Schools of London, England, and the Toronto Conservatory of Music:

Medical Service Arranged

Medical service arranged for Champion and district during Dr. Freese's absence. At the request of Champion residents Dr. C. Galbraith of Vulcan has agreed to visit Champion as follows:

Friday evening until Saturday noon and Tuesday evening until Wednesday each week, phone 14, the residence of Mrs. Woodhull.

Many residents of Champion and district were fortunate in viewing the eclipse of the sun through smoked glass on Wednesday at 12 o'clock noon.

The funeral of the late Charles Wynn of Plainfield district who died Sunday, took place Monday, August 29 from Mr. Alf. Wynn's residence. The service was conducted by Rev. R. E. Finlay of Carmanagay.

There has been a heavy shipment of grain to Churchill this year. Before the ice blocks the passage more than 2,000,000 bushels of grain will have moved out of this northern port to the market of Great Britain and the continent of Europe.

School opened on Thursday and there was the usual rush for the many accessories required by pupils, making quite a stir in town. The staff is the same as last year except that Miss Cook is taking the room formerly taught by Miss McFall.

The following teachers are in charge of the country schools adjacent to Champion: Harmony, Miss Agnes Patterson; Hiawatha, Miss Dorothy Gorgens; Parkland, Long Coulee, Miss Gertrude Roebuck; Sanderson, Miss Sarah Fleming; Yale, Miss Edna McNaughton; Fireguard, Miss Augusta McNaughton.

Miss Beulah Walker, L. A. B.

Miss Walker was a student of the Lethbridge Conservatory of Music for number of years and in 1928 took the Medal for the whole Dominion in the Advanced Piano Examination. She is also a pupil of Mrs. Gladys McKelvie, Eminent of Calgary on piano. Miss Millicent Lawlan in Theoretical work, and also a pupil of Mr. Norman Wilkes of the Toronto Conservatory of Music. She is now in charge of the Theory, History and Pianoforte Departments of the Champion and Vulcan Branches of the Lethbridge Conservatory of Music.

Why Not Try Pool Elevators?

Alberta Pool elevators are now operated under public license and are in a position to handle any grower's grain on the open market basis.

The excellent patronage extended to these Pool elevators during the immediate past crop year, by many growers who were never members of the Wheat Pool, is testimony to the favorable reputation enjoyed by this co-operative elevator organization.

The Alberta Pool elevators are being operated on a basis of no discrimination between customers and with the definite policy of extending fair and equitable treatment to all persons using its facilities. Why not give the Pool elevator a trial?

Arrangements can be made to pool any proportion of a member's wheat that he may desire. Information regarding this can be furnished by your Pool agent.
